

## QUALITY POLICY

ENERGO-PRO is committed to the highest Quality standards, Environmental and OHS standards. ENERGO-PRO requires all its contractors, subcontractors and suppliers to act in accordance with these standards defined in the Global Quality Policies. In all our energy production and sales activities;

- To work in accordance with applicable national and international quality standards and legal legislation requirements,
- Using reliable equipment, producing quality and uninterrupted electricity, to transmit it to the system error-free, on time, accurately and reliably,
- To ensure the reliability of our facilities and the continuity of production,
- To lead quality, environmental protection and OHS,
- To prevent pollution by protecting the environment,
- Without compromising on quality, environmental protection and OHS, "To bring Employee and Customer Satisfaction to the forefront,
- To fulfill all its legal obligations, especially all relevant standards, laws, regulations, legal and other conditions in force,
- To prevent work-related accidents and injuries by minimizing risk factors,
- To contribute to the increase and development of the service quality of the Energy Sector,
- To continuously improve the effectiveness of the Quality, Environment and OHS systems being implemented,

Principles are taken as basis.

ENERGO-PRO is dedicated to a sustainable quality principle. In the success of our company; We believe that the constructive and voluntary participation of our employees at all levels, coordination with all relevant organizations and our commitment to continuously improve our quality standards play a key role.

Our mission is to work in harmony with nature, our vision is to be a leader in the sustainable development of renewable energy sources. Our motto is, "Energo-Pro Always Aims for the Best".

Best Regards

Murat DAĞDEVİREN
